Introduction

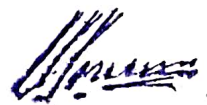

What is Engineering Today?

Engineering Today is a technical event organized by the AISSMS College of Engineering, commenced in the year 2006. The main objective of Engineering Today is to work for improvement of technical knowledge of students and also providing them an exposure to technical world by involving them in various technical events. The event, till date has been a major success all over Pune and Maharashtra and we plan to expand its reach substantially on a national level.

Decoration Theme

Department of Civil Engineering conducted the technical festival Engineering Today for 2019 as Civispark under the theme " Love Civil ". Civil Engineering since the beginning of the engineering branches has been at core always and is the basis for infrastructure and shelters for mankind. This is the reason we referred to buildings and Arch.

Along with this theme, the main attraction was decorations. All the students of the department worked hard together to represent the same through meaningful captions and models. The efforts of students caught the attention of the guests and visitors. We have also prepared a model related to " Ghatghar Hydraulic Dam " for the Science exhibition, which will be discussed later in detail.
