## Best Practice 2

### Title of the Practice: Campus to Community Connect

#### Objectives of the practice:

- To serve the community through technical knowledge
- To strengthen bonding between the institute and community.
- To sensitize students to address real-life societal development challenges and implement solutions for local issues such as water, energy and health.
- To foster partnerships with communities to leverage knowledge and wisdom, while bridging the gap between the institute and community.

#### The context:

- There is nothing more beautiful than someone who goes out of their way to make life beautiful for others.
- In line of vision of institute, the institute takes classroom learning into practice to provide solutions for real-life problems through the campus-to-community connect practice.
- National Service Scheme play vital role in implementing the holistic approach grounded in principle of social justice, social equality and social empowerment.
- Through these activities, institute has received honours at state and national levels.

#### The Practice:

- The institute adopted five villages and identified the local real life problems.
- After rigorous surveys institute identify diversified challenges in the areas of water, energy, health, infrastructure, environment and agriculture.
- The institute start working on these problems, designing solutions, and effectively implementing them.
- In addition to that the awareness programs are conducted in the adopted villages.
- In the water sector, issues such as wastewater management and drinking water quality are identified.
- During survey, in the local community health issues were observed due to impure water.
- In this program, the participating students and staff are instructed well in advanced about the program.
- The participants are appreciated, and volunteers are felicitated with certificates, medals and trophies etc.

Thus, the campus-community connect plays pivotal role in developing social skills by building qualities of ethical and responsible citizens. It also improves student health and wellbeing, mitigate social and ecological problems, and nurture institute-community relationships.

**Evidence of Success:**

- The severe drinking water crisis due to the percolation dam constructed by Government agencies is identified in Kalyan village and discussed in Gram Sabha.
- To address this, institute initiated manual and satellite surveys as decided Gram Sabha and prepared a result sheet.
- Gram Sabha approved the repair of the percolation dam.
- The proposal was presented in the ZP official meeting, and the Government of Maharashtra sanctioned it as a pilot project with financial support.
- Currently, work on the percolation dam is in progress, and upon completion, it will effectively resolve the water crisis in Kalyan village, providing water for drinking and agricultural purposes.
- Open drainage caused problems in both Malvandi Dhore and Tulapur villages, but the institute constructed cost-effective and efficient soak pits to address this issue, both villages have become open drainage-free.
- Water ATM is installed in Malvandi Dhore in association with NGO.

Through this practice, Students realized that community problems can be solved with scientific and engineering solutions.

**Problem encountered and Resources required:**

- Not ready to adhere to change and non-cooperation by villagers.
- Schools, districts and states still require assistance in developing comprehensive programs.
- Delay in decision making process.
- Inadequate resources to interact with the community.

## REPORT

On the 1st day of camp, i.e., 28-2-22, science exhibition at school. On February 28th, 2022, a special residential camp at Kalyan village was planned by AISSMS College of Engineering Pune ,NSS unit with 75 students. The students ate their lunch after they had placed all of their belongings and bags. After that, a team was formed and then everyone was assigned to some tasks ,like we had to bring water from the well for the preparation of dinner. **Our NSS volunteers held** a Science Exhibition for the students in which our NSS volunteers showed various science projects to school students. In the evening we had a guest lecture by Mrs. Nandini Jadhav on how superstition is a social curse. All 73 volunteers managed and conducted the programme from their respective fields under the supervision of programme officer Dr. N. N. Shejwal and NSS coordinators. We got a chance to interact with each other on the first day.

### REPORT

On the 2<sup>nd</sup> day of camp, i.e., on 1-3-22, The day began at 5:30 am with a yoga session for camp and a motivational speech by Dr. N. N. Shejwal, sir. At 8 am, breakfast was given to everyone. After breakfast, everyone got instructions for their activities and started the cleaning. We started cleaning the place with immense energy. We cleaned the stones, plastic wrappers, bottles, etc. During this task, many of our team members got hurt due to torn gloves. The area was cleaned to such a level that the villagers were impressed. We did another task of digging land for tree plantation. This task was also completed in no time. After the tasks, we were called to welcome Mrs.PoojaParge Tai, who is the chairman of the Women and Children's Development Department of ZillaParishad, Pune. She was welcomed with warm greetings from everyone. She gave us her valuable advice and, after that, on the inauguration of our camp, the tree plantation was done by her and she left for other work.

### REPORT

On the 3<sup>rd</sup> day of camp, i.e., on 2-3-22, We had to trek to Sinhagad fort. We had a great lecture by Mr. Manohar Khake, sir. A trek to the auspicious and marvellous Fort Sinhagad, which was very informative and motivational. We had such a motivational lecture by Mr. Manohar Khake, sir. The day began at 5:30 am with an early trek to Fort Sinhagad . The sunrise from the peak was mesmerising and satisfying. We did a cleanliness drive at Sinhagad fort at the place where we were distributed. We all descended till lunch time and all had a fulfilling lunch. After lunch, everyone took a little rest and started to do their assigned work, like painting. We painted the entrance wall of Kalyan village. In the evening, the guest gave an informational as well as motivational session to all students. After dinner, the cultural performance of team Shivallik started and they performed a skit on "Past Raigad and Present Raigad". They also performed dance.

### REPORT

On the 4<sup>th</sup> day of camp, i.e., on 03-3-22, the day began at 5:30 am with a yoga session. On this day, we carried out the activity of painting in the village. The guest lecture is done by Mr. Ayush Prasad. First of all, we cleaned the surrounding area around the places where we are going to paint. After the painting task, we were allotted the classes to teach the students in the school. After that, we had a lunch break and then back to the teaching work. We were allotted classes from 1st to 10th. This was a great experience for all of us. We enjoyed a lot while interacting with them. On this day, the evening lecture was initiated by Mr. Ayush Prasad, who was our guest. He has such a friendly nature. In his busy schedule, he gave some time for us. It's such a pleasure for us. It was a great session at the end. After the session, we had our dinner, and after that, a cultural performance was done by the team.

## REPORT

On the 5<sup>th</sup> day of camp, i.e., on 4-3-22, we had our kitchen and cultural activity. We got up early in the morning at 5 o'clock. All the boys went to fetch the water for making breakfast from the well. After that, we cleaned the premises area of the school by doing sweeping. Other team members were helping kale mama with making breakfast. A few were washing the dishes. We made pohachivda for breakfast. The arrangement of seats was so cool. Then we moved to plan further things for the day. We started writing the script for today's "Pathnatyaa". After some time, we started to prepare lunch. The menu for lunch was Masurdaaltadka, varan, rice, chapati, and pickle. We made some changes in chapati making, making chapati a bit larger in size with oil. The count of chapatis was around 200. And that was loved by everyone. We also helped some women to bring water from the well.

### REPORT

We had computer literacy, cleaning, and village beautification duties on the sixth day, or 5-3-22. Digital literacy among the people is important and necessary for their improvement and the improvement of the village. The day started at 5:30 am with a camper yoga class. Day began with self-defense instruction given to students by our volunteers, followed by a computer literacy survey. We were instructed to complete a digital survey after lunch until 4:00 PM. Then Mr. Anil Kengar sir gave a talk to us about social awareness. Following the session, we had dinner. Our seniors came to visit us that day in the evening. A cultural group presented their work.

## REPORT

On the last day of camp, i.e., on 6-3-22, the programme was initiated by Mr. Dhananjay Narwade to introduce the topic "How to become an entrepreneur." The first thing he said was how to get success in your life and how he succeeded in becoming an entrepreneur. He told us about all the difficulties he faced while starting his business and motivated us with his successful story. We had a great Bharud by Mr. Anil Kengar. The cultural team performed their performances. In between, a group of Kalyan school girls performed their performance Mr. Dhananjay Narwade told us his past experience of how to become an entrepreneur In the Bharud Session we were much entertained by Mr. Anil Kengar. He is such a great person. It was such a hilarious part of the day. After that, on the last day of this NSS camp, we had our campfire. In this, each and every one has shared their thoughts about this NSS camp.

Time: 1:00 pm

Venue: Kalyan village

Event Report:

All India Shri Shivaji Memorial Society's College of Engineering, Pune- 01 National Service Scheme had organized a survey for dam construction at Kalyan village. Prog. officer and students participated. The reconstruction project is essential to ensure the dam long-term functionality, safety, and toughness against potential hazards. The purpose of a dam is to impound (store) water for any of survival during summer season when there is scarcity around. The rotary club members and the villagers also associated during the survey on ground. A meeting too was held with the Sarpanch club members discussing the further plan of action and reconstruction of the dam.

Event Report:

On the 3<sup>rd</sup> day of camp, i.e., on 2-3-22, We had to trek to Sinhagad fort. A trek to the auspicious and marvellous Fort Sinhagad, which was very informative and motivational. We had such a motivational lecture by Mr. Manohar Khake, sir. The day began at 5:30 am with an early trek to Fort Sinhagad . The sunrise from the peak was mesmerising and satisfying. We did a cleanliness drive at Sinhagad fort at the place where we were distributed. We all descended till lunch time and all had a fulfilling lunch. After lunch, everyone took a little rest and started to do their assigned work, like painting. We painted the entrance wall of Kalyan village. In the evening, the guest gave an informational as well as motivational session to all students. After dinner, the cultural performance of team Shivallik started and they performed a skit on "Past Raigad and Present Raigad". They also performed dance.

Event Report:

All India Shri Shivaji Memorial Society's, College of Engineering, Pune-01, National Service Scheme has conducted a Computer Literacy session for school students at ZP School , Kalyan, Tal. Haveli, Dist. Pune The purpose of this study was to investigate students' perceptions of computer literacy skills they had obtained prior to enrolling in a university and to develop implications and recommendations for teaching a college-level computer course. Students were asked to identify their skill level in various types of software and their exposure to computer concepts and issues. In our contribution we focused on finding out the information and computer literacy of high school students. Many of them were familiar with the computer and the parts. Even they knew a little about the software part of the computer. We found that the main activity of students on the internet is the search for information (e.g. themes on essays, complementary information to the curriculum...). It means that computer literacy of students is improving

Event Report:

All India Shri Shivaji Memorial Society's, College of Engineering, Pune-01, National Service Scheme unit on 13 October 2021 conducted an activity on Women Hygiene Importance at Tulapur village, where NSS volunteers interacted with the women of the village. Mr. Parag Mate and Mr. Raj Dekhmukh had visited Tulapur village. We provided information to women of Tulapur village like :Poor intimate hygiene can affect your sex drive, cause fertility issues and some infections begin from your privates but slowly spread to the entire body which can be fatal.

- **Many people link intimate hygiene with women**, but keeping your privates clean and healthy is equally important for men.
- **Washing hands regularly** is the single most important hygiene step in fighting the spread of bacteria and other germs. Keeping hands clean is one of the most efficient ways to fighting the spread of bacteria and other germs

Savitribai Phule Pune University, Pune in collaboration with All India Shri Shivaji Memorial Society's, College of Engineering, Pune-01 National Service Scheme unit organized a Global Level Poster Making Competition. As we are aware about the situation we are going through, it was very important to create awareness regarding COVID-19 and make people aware about the rules and safety precautions related to COVID-19. And taking a poster making competition was an initiative from our NSS unit. The poster making competition got huge response of participants was witnessed, not only young but also elderly people showed interest in huge amount.

Event Report:

All India Shri Shivaji Memorial Society's, College of Engineering, Pune-01, National Service Scheme unit conducted a webinar on the occasion of World Environment Day. The Chief Guest made us aware and encouraged us about the actions for the protection of the environment. Then our audience asked some question to our Guest and it was very interactive and intellectual session for everyone. The host expressed gratitude towards our chief guest, principal and our program officer, the staff and the students for gracing the webinar. Before concluding we captured this wonderful moment.

Event Report:

All India Shri Shivaji Memorial Society's, College of Engineering, Pune-01, National Service Scheme unit participated in "Spitting Kills Campaign" and created an awareness regarding "SPITTING KILLS".

Experts have determined that spitting spreads the virus and chewing tobacco, gutkha, etc. causes an urge to spit, our NSS unit has created awareness among 6000+ people by telling them to take pledge regarding the same and still the campaign is in progress. This is an initiative taken to avoid the spread of Covid-19 due to spitting.

AISSMS College of Engineering Pune has received an appreciation letter on the behalf of "Pledge for Life" team for supporting the campaign.

Event Report:

All India Shri Shivaji Memorial Society's, College of Engineering, Pune-01, National Service Scheme unit conducted a webinar on women empowerment through financial literacy. Even in the 21<sup>st</sup> century, India is still seen as a male dominated country. Even today, females are worshiped as Lakshmi by everyone but aren't financially literate, to help women manage their home as well as their finance. Money is an important part of financial freedom. The end goal is freedom and, 'stable finance brings freedom.

Webinar started and our Principal Dr. D.S. Bormane Sir and our Program Officer Dr. N.N. Shejwal Sir spoke a few words and welcomed our Guest of honor Miss Shikha Mittal.

Then our host introduced our Chief Guest Miss Shikha Mittal ma'am, the founder and director of Be. Artsy, a non-profit social awareness enterprise that leverages the power of art to influence positive social impact.

In all it was a great session which proceeded to the future where our Chief Guest addressed our audience where ma'am taught them about the importance of financial literacy and financial freedom. She shared with us the golden rule for being financially stable which is  $3/3=1$ . Basic concepts regarding finance were clear. Our audience then asked a few questions and they were answered very satisfyingly by our guest of honor. It was a really interactive session and was helpful for each and every audience.

Date: 09 Nov 2020

Event Report:

All India Shri Shivaji Memorial Society's, College of Engineering, Pune-01, National Service Scheme unit held an event titled "Be Vocal Buy Local", held for 6-7 days.

Diwali, the festival of lights, is a celebration that marks the victory of good over evil, light over darkness, knowledge over ignorance. Diwali is celebrated all over communities of India, creating a homogenous environment of goodwill and happiness. It is a time for both, gratitude and gaiety. So this year our NSS team had thought to celebrate this Diwali Eco-friendly & to work this idea we organize an event for preparation of this event we had arranged 3-4 meetings. This Diwali 2020 we made a difference & took initiative to make difference by helping Local Vendors by buying Local Products to motivate everyone to buy local. Our volunteers had made a short video on the occasion of Diwali. Celebrating Diwali is not just about bursting Fire Crackers and eating Diwali's special snacks (Faral), but to light the life of others and fill it with joy and happiness. Firing/bursting crackers leads to Pollution which is harmful for both Nature as well as humans. The ratio of economy of people states that there numerous people who has very less economy and within that it's hard to manage the regular necessities and for them Diwali seems to be as a forbidden fruit. So why not, everyone contribute a little amount for their happiness. So our NSS team decided to do some dedication to our Society.

Time; 11:00 am – 12:00 pm

Event Report:

All India Shri Shivaji Memorial Society's, College of Engineering, Pune-01, National Service Scheme uniton the occasion of Farmers Day, held a webinar which was witnessed by Chief Guest Dr. Manohar Khake Sir, Principal Dr.D.S. Bormane Sir, Prof. N. N. Shejwal Sir, AISSMS and other college lecturers, 122 participants joined us on this occasion which was organized on Microsoft teams, an online platform. Along with the protection of our soldiers, Farmers are considered the backbone of our country. We know farmers are very important as they are the ones who provide us with the nutrition n healthy food that we eat. Nearly 70% of the rural household depend on the farming, with around 82% farmers being small n marginal. As per 2018, agriculture employed more than 50% of the Indian work forces and contributed 17–18% to country's GDP. Certain years ago, there was a shift from traditional farming to farming with chemicals and pesticides. India was gravely short of foodgrains, and this agricultural shift came in handy. With massive inputs of chemical fertilisers, pesticides and water, high crop yields were achieved. The purpose of holding the webinar was to know the importance of Organic Farming. Considering issues of health and economy in the modern world, organic farming will prove to be a viable option for every consuming human and the producing farmers as well. Webinar started at 11am. Our host introduced the event and asked our Program Officer Dr. N.N. Shejwal Sir and Principal Dr. D.S. Bormane Sir to welcome our Chief Guest. They also gave information about Dr. Khake's book, 'Matiche Swarup Ani Sendriy Khate' and added few words regarding 'Unnat Bharat Abhiyan'. Then our host introduced our Chief Guest to the audience and requested them to address the crowd. Then Dr. Manohar Khake Sir, with his immense knowledgeable words, started discussing his ideas with Students. He put froth his concept of 'Air Irrigation'

Date: 12/01/2021

Time; 12:00 am to 4:00 pm

Event Report:

All India Shri Shivaji Memorial Society's, College of Engineering, Pune-01, National Service Scheme unit gave the pre-information about Health Check-up Camp to all the villagers. The main moto of health check-up camp was to administer health assessment, spread health awareness and provide health counselling. In such a pandemic situation it's very important to take care of our health. So, our Principal Dr. D. S. Bormane Sir & Prog. Officer Dr. N. N. Shejwal Sir also motivated the villagers to do their Health Check-up.

A health check-up camp had been set up in Kalyan (Pune) by NSS volunteers. Body-Temperature, Oxygen-level, was checked on every patient before getting the check-up. In the camp, proper medical treatment of the villagers and remedial measures were provided, all free of cost, including the basic medicines required for an early recover. Our NSS volunteers took down the details of the people who came for this health check-up. Villagers shared their problem with doctor & got the best treatment from them. NSS volunteers encouraged the villagers to do simple activities on a regular basis to get rid of the excessive body pain. Majority of the people were suffering from body pain, swelling, cough, fever, weakness.

Great response was observed from the villagers, 142 villagers were willing to check their physical health.

Event Report:

All India Shri Shivaji Memorial Society's ,College of Engineering, Pune-01, National Service Scheme unit on 15<sup>th</sup> January, 2021 conducted activity on Women Literacy at Kalyan village, where NSS volunteers interacted with the women's of the village.

During the interaction the following points were observed:

- The women in the age group of 50-70 are mostly illiterate. Few of them are familiar with basics of language (Marathi) like alphabets & numbers.
- The women in the age group of 30-50 were mostly educated upto primary school or secondary school. There were a very few of them educated upto higher secondary school.
- The age group below 20-30 included women's almost educated many of them were educated uptill higher secondary & so on, in which few of them do some job.
- The rest were school going girls.

Volunteers Creating awareness amongst the women regarding importance of education.

Volunteers go door-door to create awareness regarding importance of education.

Name of Guests: Hon. Chh Malojiraje Bhonsale.

Name of Coordinator: Dr. N.N.Shejwal (P.O.NSS)

Participants: Teaching, Non-Teaching Staff and Volunteers

No. Participants: 442

Date: June 23, 2019

Time: 10.00 am

Venue: SPPU

Event Report:

The sampling of Kadulimb was collected from the university after the largest sampling distribution program, which makes the GUINEESS WORLD Record. The sampling has been planted in the college premises during the wari period. Total 20 sampling have been planted in the college campus in presence of principal and NSS volunteers and security guard people. This will help to reduce the global warming and will save the environment and enrich the pleasantness the campus.

Date: 22 Feb 2020

Time: 10.00 am to 4.00 pm

Venue: Sant Dnyaneshwar Auditorium, SPPU Campus

Event Report:

The basic definition of Sahakar in english a cooperative (also known as co-operative, co-op, or coop) is "an autonomous association of persons united voluntarily to meet their common economic, social, and cultural needs and aspirations through a jointly-owned enterprise"<sup>[1]</sup> Cooperatives may include businesses owned and managed by the people who use their services (a consumer cooperative)

- organizations managed by the people who work there (worker cooperatives)
- multi-stakeholder or hybrid cooperatives that share ownership between different stakeholder groups. For example, care cooperatives where ownership is shared between both care-givers and receivers. Stakeholders might also include non-profits or investors.
- second- and third-tier cooperatives whose members are other cooperatives
- platform cooperatives that use a cooperatively owned and governed website, mobile app or a protocol to facilitate the sale of goods and services.

In this workshop, NSS volunteer got knowledge about how co-operative sector work, how it is beneficial to our Rural development & Society from Experience Lectures Session schedule is given below.

Name of Guests: Dr. Nitin Karmalkar

Name of Coordinator: Dr. N. N. Shejwal

Participants: NSS Volunteers

No. of Participants: 20

Date: 23 February 2020

Time: 7am to 5pm

Venue: Sinhgad Fort, Pune

Event Report:

As we all are aware about the current situations of forts in Maharashtra, NSS-SPPU organized 'Fort Conservation Campaign' which was started from Sinhgad Fort in Pune on the occasion of " Sant Gadgebaba Jayanti ". Around 1300 NSS volunteers from different colleges affiliated to SPPU have participated in this campaign. Travelling from our respective colleges to Sinhgad Payatha and after a hard trek of 2 hours we reached to the top of the fort . We arrived to specified location on the fort where all volunteers were addressed by The Vice Chancellor of SPPU Dr. Nitin Karmalkar, Director of NSS-SPPU Prabhakar Desai Sir and other important persons related to this particular activity. For motivation of volunteers a small cultural program was also arranged which was including the Maharashtra Folk Music named as "Powada" in which narration of historical events related to Chhatrapati Shivaji Maharaj take place. After listening to such energetic Powada and some refreshment we were divided into groups provided with all safety mask, hand gloves and bags, started our work.

**Activities:**

- 1) Our volunteers helped the organizer team of SPPU in transporting the meal boxes to the given location .

Event Report:

Addiction is the term given to a pattern of behavior that causes negative consequences for the individual. Most people assume that addiction refers only to those who have a compulsive need for a particular substance such as alcohol or drugs. However, in reality, it is possible to become addicted to almost anything. To be clear, this condition occurs when a person continues to do something despite knowing that it will have an adverse impact on his or her life. Because of the various causes and triggers, there are many different types of addictions. According to the Magnitude of Substance Use in India report submitted by the National Drug Dependence Treatment Centre of the All-India Institute of Medical Sciences to the Ministry in February this year, 1.3% of children between 10 and 17 years reported current use of alcohol, 0.9% reported use of cannabis, 1.8% reported use of opioid and 1.17% reported use of inhalants. According to the 2017 report by United Nations Office on Drugs and Crime (UNODC), 255 million people worldwide use illicit drugs, of which 29.5 million suffered from drug use-related disorders. So, it is necessary to spread awareness about addiction and its drawbacks over the young generation. In this context, NSS volunteer had taken a lead and extended the helping hand to manage and support De-addiction workshop. The workshop Schedule is given in following table,

### Programme Schedule

Time	Program Name	Resource Person
8.30am to 10.30am	Registration and breakfast	--
10.45am to 11.45 am	Introduction to De-addiction and case studies	Dr. Anil Avachat
11.45am to 12.45 pm	Role of NSS in Drug Abuse Prevention	Dr. Vilas Ugale
12.45pm to 2.00pm	Lunch break	---

2.00am to 3.00 pm	Changing Trends of addiction	Mr. Mangesh Kurlekar
3.00pm to 4.00pm	Types of drugs, Characteristics, Myths and Facts	Mrs. Manisha Bora
4.00pm to 4.30pm	Validation	Dr. D. S. Borane
4.30pm to 5.00pm	Feedback	--

## Session-I

**Time:** 10.45am to 11.45 am

**Resource Person:** Dr. Anil Avachat. (Director of Mukangan, De-addiction Center, Pune)

**Topic Name:** Introduction to De-addiction and case studies

Registration for the workshop was taken by NSS volunteers from 9.30am to 10.30 am and provided a workshop kit per each student. A workshop kit contains Pen, Diary and one document folder etc. After a registration breakfast and tea given to all participants and after that session one started at 10.45 am taken by Dr. Anil Avachat. The NSS volunteers dialogue with Dr. Anil Avachat sir and discuss their problems. This session is quite interactive due to direct communication with guest and discussion of their problems.

**Session 1 by Dr. Anil Avachat Sir**

## Session-II

**Time:** 11.45am to 12.45 pm

**Resource Person:** Dr. Vilas Ugale.

**Topic Name:** Role of NSS in Drug Abuse Prevention.

The NSS volunteers dialogue with Dr. Vilas Ugale. sir and discuss their problems. This session is quite interactive due to direct communication with guest and discussion of their problems.

**Session 2 conducted by Dr. Vilas Ugale Sir**

### Session-III

**Time:** 2.00am to 3.00 pm

**Resource Person:** Mr. Mangesh Kurlekar ( Muktangan, De-addiction Center, Pune)

**Topic Name:** Changing Trends of addiction

As topic name suggest this session is fully loaded with key points that highlights the changing trends of addiction. Use of Presentation slides and short film videos made this session more intractive and impactfull. Students started thinking about how we flow with such things easily and spoil our beautiful life by making ourself addict in unnecessary things. Mr. Mangesh Kurlekar sir explained various types of drugs, types of addictions, symptoms and experiences in their Muktangan organization. Mr. Sachin sir (member of Muktangan, De-addiction Center, Pune) they had also shared a experiences in their Muktangan organization with drugs addicted people.

### Session-IV

**Time:** 3.00pm to 4.00pm

**Resource Person:** Mrs. Manisha Bora (BJS's,ACS College, Pune)

**Topic Name:** Types of drugs, Characteristics, Myths and Facts

As topic name suggest this session is fully loaded with key points that highlights the Types of drugs, Characteristics, Myths and Facts. Use of Presentation slides made this session more interactive and impact full. Students started thinking about how we flow with such things easily and spoil our beautiful life by making ourself addict in unnecessary things. Mrs. Manisha Bora explained various types of drugs, useful information of drugs and experiences in their work field.

**Session 4 conducted by Mrs. Manisha Bora ma'am**

Name of Event: Chh. Shahu Maharaj State level Street Play competition

Name of Guests: Mr. Satish Gedage, Mr. Rajkumar Jarange, Mr. Shreyas Behere

Name of Coordinator: Dr. N. N. Shejwal

Participants: NSS Volunteers

No. of Participants: 235

Date: February 10, 2020

Time: 09.30 am to 04.30 pm

Venue: AISSMS College of Engineering, Pune01

Event Report:

All India Shri Shivaji Memorial Society's College of Engineering, Pune- National Service Scheme had organised a state level street play competition named: **CHH. SHAHU MAHARAJ STATE LEVEL STREET PLAY COMPETITION** on 10 February 2020; from 10A.M. TO 3:00PM; With a vision to highlight various issues ranging from domestic violence, discrimination, road safety etc. The theme for this competition was "EK BHARAT SHRESHTHA BHARAT" as published under of government of India. Through street plays, we attempt to create awareness about various social issues and their probable solutions, to move a step closer to a society we would like to live in.

Total 30 NSS volunteers was in organising committee and they worked under various departments like Registration, Hospitality, Lunch and breakfast arrangement, Stage arrangement etc.

Total 12 teams participated in this competition. There was lunch and breakfast arrangement for the teams. A unique Colour bands was given to each team at the time of reporting. Each team was provided by separate sitting arrangement and one NSS Volunteer for their guidance and hospitality. Participated teams performed very well and made very enthusiastic environment. Amongst 12 teams the first prize was won by "Sinhgad Institute Vadgaon (Centralized)" and performed the play: Mujhe Modern Banna Hai. Second prize was grabbed by "Sir Parshurambhau College" which highlighted the topic: Ek Bharat Shreshtha Bharat. Third prize was won by MIT Kothrud highlighting the topic: Journalism (The Yellow Puppet). The appreciation ceremony didn't ended here; young talents were also felicitated for best actor, best actress and best original script. Best actor was won by Shaileshkumar Bichewar - (G.H Rasoni college, Wagholi), Best actress- Sakashi Vahadne- (Smt. Kashibai Navale College) and best original script named: "Samajatil jvalant va jivant samsya" won by Sinhgad College Of Engineering Vadgaon. The "Kaal"(Marathi Movie) movie team was present for the Price distribution and winning prices are given by them.

Time: 10.30pm-12.30pm

Venue: Deccan, Pune

Event Report:

As we know in our city there is problem of vehicle traffic and increasing number of road accidents. These accidents are due to lack of knowledge of traffic rules and lack of safety precautions. To aware people about traffic rules and safety precautions NSS volunteers taken an initiative to arrange Road safety program. On date of 26<sup>th</sup> January 2020 AISSMS college of engineering's 15 NSS students did this program at Deccan Pune. In this program PSI Deccan appreciated the work and supported for this Nobel activity. In this program awareness was created in crowd of people near main traffic signals with the help of small interaction with people, Slogans and hand boards with safety messages written on that.

Venue: ZP School, Kondhanpur , Pune

Event Report:

In this era, the energy is an essential component without which we cannot imagine living or performing any of the tasks. For the comfortable lifestyle, energy plays an important role. We perform various tasks with the energy such as heating, cooking, lighting, etc. with the help of furling energy, we run our vehicles and move from here to there. With the coal and wood energy, we cook our food and keep our homes warm. Therefore, it seems obvious that how much useful the energy is for our lives. It's important to make people aware about saving energy. In this Context AISSMS College of Engineering National Service scheme unit in association with has arranged Energy Sever award Program in Various schools. Around 10,000 students are included in this activity. Under this program Energy sever cards has distributed to each student for Three months to take the details of light bills and the flow of control on increase in units. The student which conserves much energy that will becomes eligible for best energy award. On the date 6<sup>th</sup> Oct, 2019 we taken this program in ZP School, Kondhanpur , Pune campus in order to contribute in this Nobel activity.

Date: 15/08/2018

Time: 09:00 am

Venue: Savitribai Phule Pune University.

Event Report:

This Independence day Government of India had taken an initiative of creating awareness among the people regarding fitness. In this FTII i.e. Film and Television Institute of India contributed by making a short film named **HUM FIT TO INDIA FIT** encouraging participation of NSS students from all the colleges. AISSMS COE NSS Unit responded actively by showing participation of total 19 volunteers in this short film. The short film included about 150 NSS volunteers, showing their talent in various forms like dance, lazim, lathi-kathi, karate, yoga, etc. The duration of short film was 4 minutes which released on 15th of August. The main theme of short film was to make people aware regarding importance of fitness by doing regular exercises and practising yoga. This message was passed on with the help of song hum fit to India fit on which traditional sports and culture of India was shown.

Name of Event: Construction of Soak Pit  
Name of Guests of Honour: Dr. N. N. Shejwal  
Name of Coordinator: Dr. N. N. Shejwal  
Location: Tulapur  
Date: 16.08.2018  
Time: 09.00 am –06.00 pm  
Event Report:

The NSS Unit of AISSMS's College of Engineering, Pune comprising of 18 members went to Tulapur village located about 32 km from Pune City.

The main motive of our visit was to give the brief information about "Swachh Bharat Abhiyan" & Govt. of Maharashtra schemes and also to spread the importance of cleanliness in the society as we are also a part of this society.

We reached at around 9:30 am in the village & had conversation with the Gram Panchayat officer Mrs. Jyotsna about the open drainage. The drainage water spread on the road and in front of the school premises so that it was very difficult to enter in the school. The dirty smell of drainage water finds very difficult to sit in the class. The AISSMS COE student observed it and decides to give the solution to this problem. They analysis the problem and prepared the plan and discussed with the grampanchayat member, Sarpanch and Gram Sevak as well as the head master of the school. They all gave some suggestion and we finally commenced the work of soak pits at 10:10 am.

We made a pit for the tank of sewage water in the primary school. A team of 4 students went to the class for teaching and briefing them about cleanliness and different education schemes for the students. They took the lecture and revision of the students. They also gave an idea about plastic pollution and how plastic waste affects the environment and encouraged them to minimize the use of plastic.

The remaining 14 volunteers started to work for making the soak pit as requested by the villagers. The volunteers started by marking the pit of size 4ft X 4ft and started digging the pit. The pit of 5 ft height was dug by the volunteers in about 4 hours. Then, a ready cement tank of size 4 x 3.5 ft. was lifted by the volunteers and set in the pit. The pit was then filled with rocks, stones, bricks and mud.

The volunteers thus completed this work within 8 hours work. The volunteers enjoyed a cup of tea after the work was completed and then everyone departed towards college with a feeling of satisfaction. The team had a great time with the villagers and students of the primary school in the village.

Date: 08-09/07/2018

Name of Co-ordinator: Dr. N.N. Shejwal (P.O. NSS)

Number of Participants: 50

Time: 6.00am to 8.00pm (Sunday) 8.00pm to 11.00am (Monday)

Venue: Kasture Chowk, kondhare wada, Nana Peth, Pune.

## Event Report

Pandharpur Wari is an annual pilgrimage Alandi to Pandharpur in Maharashtra in the month of July every year. Sant Dnyaneshwar and Tukaram are taken from their respective shrines to Pandharpur. This is 21 days March on foot from various locations in Maharashtra to Vithoba temple, Pandharpur, attracts a total of over a million pilgrims. Devotees from Maharashtra and nearby areas set out for Pandharpur,

As per the circular of Savitribai Phule Pune University, Pune-07 about the Swachha Wari, Nirmal Wari, Nisarg Wari, the All India Shri Shivaji Memorial Society's , College Of Engineering, Pune-01, National Service Scheme unit has been participated in the Niramal wari Programmme on 8<sup>th</sup> and 9<sup>th</sup> July 2018 at Kasture Chowk , Nana Peth, Pune.

The volunteers reached the Ladkat School, Nana Peth, Pune on 8<sup>th</sup> July 2018 at 6.00am early in the morning. It was tea time early in the morning, so the the volunteers immediately helped to the local people for serving tea, biscuits and breakfast to the pilgrims of Dindi. Further the volunteers have been carried out the cleaning drive in Kasture Chowk and Kondhare wada area. The volunteers collected the plastic wrappers of Biscuits, empty glasses of tea and water and empty breakfast plates. While conducting the cleanliness drive volunteers also make awareness regarding the cleanliness. The volunteers appealed to the people that do not spit on road and public places. Simultaneously the some group of volunteers helped local people and police in the traffic management and directing the people participated in Dindi. Some volunteers help the missing pilgrims to find out their dindi location. After 11.00am all the boys volunteers started working for the arrangement of the lunch for the pilgrims in association with local organizer and also washed the utensils for cooking of food. The girls volunteers involved themselves in kitchen job and helping the cooks and the women in preparing of dough, puri , washing and cutting of vegetables. The girl's volunteers also learn from the pilgrims how to make the Jawar and Bajari bhakari (Roti). The volunteers visited to the different dindi and they had some conversation with pilgrims and enjoyed the Bhajan, Kirtan and learn the tradition. It was the lunch time; volunteers took the charge of serving the food to the pilgrims with the glass of water. Within the period of 2hrs, volunteers served the food more than 1000 pilgrims. Then the volunteers took lunch. During the lunch break, Mrs. Manisha Kondhare, Corporator, PMC, visited the place and felicitated our NSS unit and appreciated their work and help. After everyone's lunch, volunteers removed the chairs and table and cleaned the area. In the evening volunteers again helped in serving the tea and biscuits and did some cleaning and traffic management up to 8.00 pm also dialogue with the pilgrims to know about their village and life.

At 8.00pm the volunteers of night shift arrived at the location. They also helped locals in serving food and other managements. They had good talks with all varkari's and enjoyed Bhajan and Kirtan with them. Volunteers also helped those people in making arrangements of their sleeping. On 9<sup>th</sup> July 2018, the both the Palkhi's have been proceed for the next destination. After the palkhi left the nana peth, the every Main and internal roads was full of garbage. Volunteers took the initiative along with the sanitation department, PMC and cleaned each and every area of Nana Peth. Dr.Prabhakar Desai, Director, National Service Scheme, SPPU, visited to the area and carried out the inspection of entire Nana Peth area around 10.00am. Dr Prabhakar desai Sir also took the feedback and experience of Nirmal wari. He also dialogue with the volunteers, guide them and appreciated the Nobel work.

Event Report:

The Union and State Government launches several schemes for the citizens of India from time to time. They are launched for the purpose of improving the livelihood of the people and providing security for leading a better life. Each scheme is launched to provide benefits to the individual in certain areas of their life. Some schemes grant financial security while others aim to provide socio-economic measures. The beneficiaries covered under most of the individual schemes are the rural people, urban poor, low-income families, economically backward sections or weaker sections of the society. There are so many diverse schemes Atal Pension Yojana, Unnat Jeevan by Affordable LEDs and Appliances for All (UJALA), Ayushman Bharat Yojana, Grameen Kaushalya Yojana or DDU-GKY, Pradhan Mantri Gramin Awaas Yojana, Pradhan Mantri Matritva Vandana Yojana, Deen Dayal Upadhyaya Antyodaya Yojana, Pradhan Mantri Adarsh Gram Yojana, Pradhan Mantri Kaushal Vikas Yojna, Pradhan Mantri Suraksha Bima Yojana, Pradhan Mantri Jeevan Jyoti Bima Yojana, Pradhan Mantri Jan Dhan Yojana, Pradhan Mantri Awas Yojana, Antyodaya Anna Yojana, Pradhan Mantri, Ujjwala Yojana, Swamitva Yojana etc launched by government, but whether these scheme reached to the last beneficiary is an important to check specially in rural area. All these Schemes introduced for Rural Development to assist the poor families living below the poverty line in rural areas for taking up self-employment. These schemes are funded by the Central or State Government.

In this context, NSS volunteers took an initiative and spread the awareness about the schemes at kondhanpur village in pune district. They interact with the people ask them, whether they aware about the schemes or not. NSS volunteers guided to the individual villagers about the scheme benefits as well the documents required for the same and where to submit the proposal of the scheme.

Event Report:

In 21<sup>st</sup> century all are living on digital planet, the current generations are the BHUMIPUTRA of this digital planet. The revolution in every field brought by the advancement in science and technology. Everywhere we are using a smart phone and smart computers, internet for communications. The rural area should not be lagging behind in this digital era. Therefore, NSS unit of our college initiated the digital literacy program for school children. As a part of this initiative the digital literacy prog conducted in Gogalwadi ZP School in Pune districts under the guidance of prog officer Dr. N.N. Shejwal. The all-school children and teaching and non-teaching staff along with few villagers attended the program. The digital literacy program covered the peripheral equipment's of computer, its function, mobile functioning through power point presentation etc. The NSS volunteers Mr. Varad Patil was lead the activity. All the staff members and villagers appreciated the program.

## Percolation Tank Survey Report

**Title of Project:** Study and Modification in Percolation Tank at Kalyan Village

### Problem Statement

To face the problem of groundwater depletion, the Indian Government relies on large projects of Managed Aquifer Recharge (MAR). Numerous recharge structures such as percolation tanks exist but the impact of these structures on groundwater resources remains poorly understood. Although the evaporation/ infiltration ratio of percolation tanks was indeterminate.

Percolation tank of Kalyan village is not performing well and water is not retaining as per the designs, because of improper design of filter layers (beds) and unsuitable available soil strata. Water table in nearby wells are not recharged hence water scarcity problem occurred at kalyan village.

### Objectives

1. To study the existing percolation tank at kalyan village.
2. To identify the problem related to percolation tank.
3. Analysis of the percolation tank with phreatic line.
4. Modification and redesign of filter media, toe drain, waist weir.

### Introduction

Percolation tank is an artificial reservoir which are constructed across stream, submerging a land area with adequate permeability to facilitate sufficient percolation to collect surface water run-off and allow it to percolate within the permeable land. This is one of the effective methods of refilling

groundwater table (also known as groundwater recharge). These are earthen dams having masonry structures for spillway only and are preferred to be constructed over second or third order stream.

#### Guidelines:-

- Percolation tanks should normally be constructed in a terrain with highly fractured and weathered rock for speedy recharge.
- Too high permeability may result in the percolated water escaping in the downstream as regenerated surface flow, hence it will defeat the purpose of water conservation.
- The aquifer to be recharged should have sufficient thickness (about 3m) of permeable vadose zone to accommodate recharge.
- The benefitted area must have sufficient number of wells, hand pumps etc.
- It is advisable and benefitting to have the percolation tank in an area of good/ average catchment.
- A long-term evaluation of the pattern of rainfall for the benefitted area must be studied so that the percolation tank gets filled up fully during monsoon.
- To minimize the silting at the bottom of the tank, soils in the catchment area should preferably be of light sandy type.
- Except for outlets provided for surface irrigation and the depth of the cut-off trench, there is not much difference, in the construction between a percolation tank and a minor irrigation tank.

#### Methodology

The following materials are more suitable to prevent leakages as well as seepage losses in reservoir but depends on topographical condition.

### Coconut shell Threads

Using coconut shell threads is traditional but very cheap and useful method for use as a mixture for anything to increase its strength and some other properties like water holding capacity water tough water retain too. Mixture of soil, little amount of sand and coconut tenders with some amount of water is really good for retaining water in some amount.

### Bentonite Soil:-

Bentonite is the fine textured colloidal clay with as much as 90% of Montmorillonite. When exposed to water, dried bentonite absorbs several times its own weight of water at complete saturation, it swells as much as eight to twenty times of its own original dry volume. If retaining wall contains high percentage of coarse- grained particles and not enough clay, adding Bentonite to it us another method of reducing excessive seepage through it.

Natural Bentonite: Deposits exist in several places around the world, for example in the United States of America, Mexico, China and Western Europe. Before selecting this method to seal your pond, you should locate a satisfactory source of bentonite, as close as possible to your site to reduce cost. You should also ensure that the quality of the available bentonite is good: it should contain the highest percentage of montmorillonite possible (at least 70 percent). The water level of your pond should not fluctuate too much. Soil treated with bentonite will develop numerous cracks when it dries up. It is best if it always remains wet.

### Geogrid:-

A geogrid is geosynthetic material used to reinforce soils and similar materials. Geogrids are commonly used to reinforce retaining walls, as well as subbases or subsoils below roads or structures. Soils pull apart under tension. Compared to soil, geogrids are strong in tension. This fact allows them to transfer forces to a larger area of soil than would otherwise be the case.

Geogrids are commonly made of polymer materials, such as polyester, polyvinyl alcohol, polyethylene or polypropylene. They may be woven or knitted from yarns, heat-welded from strips of material, or produced by punching a regular pattern of holes in sheets of material, then stretched into a grid.

### Light Organic Material:-

A simple method that greatly accelerates the sealing of a pond bottom is to spread enough cattle manure over it (at least  $2 \text{ m}^3/100 \text{ m}^2$ ) before filling the pond with water. Repeat this procedure several times if necessary, at intervals of eight to 12 months, until seepage losses become acceptable. After draining these ponds, refill them with water as soon as possible to reduce the rate of decomposition of the organic matter that seals the bottom pores.

If the dikes of a pond have been compacted very well, it may not be necessary to seal them against seepage when you seal the pond bottom. However, if you are not sure that the dikes are sound, it is best to seal them as well.

### High Density Polyethylene Sheet (HDPE):- Govt. Resolution- 2018

Govt. of Maharashtra has provided guidelines for percolation tank. The guidelines are published and given in following way.

भाग B) दुरुस्ती संदर्भात मार्गदर्शक सुचना :-

१) पाझर तलाव / गाव तलाव / माती नाला बांध.

i) सांडवा पूर्णपणे वाहून जाणे, सांडव्याच्या बारची तुटफूट होणे, पाझर तलावाचे गिंत व सांडव्याचा बारचा दरम्यान असलेली फ्लॅक वॉल (एभी गिंत) यांनी तुटफूट, सांडव्याच्या आतील बाजुने होणारे माट पाझर, सांडव्याच्या अगो भागात (Down Stream) पाण्याच्या आघाताने झालेले खोल खड्डे यासह सांडवा दुरुस्तीचे काम करण्यात यावे व अशी दुरुस्ती करताना सपट फाऊंडेशन सारख्या तंत्राचा वापर करावा. सांडवा बार कालीप्रस्ता झालेला असल्यास सांडवा बारची डागडुजी प्रचलित पध्दतीने करण्यात यावी. पाझर तलाव व सांडवा बार यामधील उभी (फ्लॅक वॉल) ची तुटफूट झालेली असल्यास प्रचलित पध्दतीने तुटफूट झालेले दगड (Masonry Work) किंवा संघानकाने बांधणी करून फ्लॅक वॉल पुर्ववत करण्यात यावी.

ii) तलावाच्या आतील बाजुने जलरोधक खंदकातून (Cut Off Trench) मधून होणारे पाझर थांबविण्यासाठी (तलावमध्ये / लगत काळी माती उपलब्ध असल्यास) तलावाच्या आतील बाजुस (Up Stream) आवश्यक त्या खोलीचा थर घेऊन घरामध्ये पाझर तलावामध्ये उपलब्ध असलेली काळी माती भरण्यात यावी व त्यानंतर पाणी टाकून दबाई (Compaction) करण्यात यावीत. तलावालगत काळी माती उपलब्ध नसल्यास, अशा ठिकाणी काढण्यात आलेल्या घराच्या लांबी व रुंदी या आकारमानाची ५०० Micron जाडीची HDPE आयएसओ प्रमाणित Sheet टाकण्यात यावी व काढण्यात आलेली माती / सॉफ्ट माती / मुरुम / (उपलब्ध असलेल्या) यांनी तो थर भरण्यात यावा. अशा प्रकारची HDPE Sheet टाकताना COE हा पूर्णतः जल अवरोध करण्याच्या अनुषंगाने HDPE Sheet ची रुंदी निश्चित करण्यात यावी.

iii) तलावाच्या भिंतीतून / बांधातून होणारे पाझर थांबविण्यासाठी तलावामध्ये / लगत काळी माती उपलब्ध असल्यास / भिंतीवर बांधावर ६० सें.मी. जाडीचा काळ्या मातीचा थर व ३० सें.मी. मुरमाचा थर देण्यात यावा व त्यानंतर योग्य ती दबाई करण्यात यावी. तदनंतर उपलब्ध असलेल्या दगडाचा वापर करून, तसेच आवश्यक असल्यास अतिरिक्त दगड उपलब्ध करून त्यावर शुष्क अश्मपटल (Dry Stone Pitching) करण्यात यावे. तसेच तलावामध्ये / लगत काळी माती उपलब्ध नसल्यास COE मध्ये टाकण्यात आलेल्या अशा प्रकारची HDPE Sheet भिंतीच्या वरील भागात सुद्धा टाकण्यात यावी. भिंतीवर/बांधावर ६० सें.मी. जाडीचा मुरुमाचा थर देण्यात यावा. तदनंतर उपलब्ध असलेल्या दगडाचा वापर करून तसेच आवश्यक असल्यास अतिरिक्त दगड उपलब्ध करून त्यावर शुष्क अश्मपटल (Dry Stone Pitching) करण्यात यावे. अशाप्रकारे HDPE Sheet ची रुंदी ही तलावापासून ३ मीटरच्या मर्यादेत ठेवण्यात यावी तसेच घराच्या उर्ध्व भागाच्या भिंतीस योग्य तो उतार ठेवावा व शुष्क अश्मपटल त्यावर स्थिर राहिल याची दक्षता घ्यावी.

पृष्ठ क्रमांक २

i) वरील (i) ते (iii) व्यतिरीक्त आवश्यक असलेल्या स्थापत्य दुरुस्ती स्थानिक परिस्थितीनुसार घेण्यात याव्यात.

२) सिमेंट नाला बांध / साठवण बंधारे स्थापत्य दुरुस्ती:-

i) सिमेंट बंधारा गळती प्रतिबंधक उपाययोजना करण्याकरीता सिमेंट बंधाराच्या आतील बाजुस (Up Stream) २० सें.मी. जाडीच्या सिमेंटची पडद्वी घेण्यात यावी, यामध्ये ८ ते १२ एम.एम. जाडीचे स्टील बंधारभरित सावे. पडद्वीचा पाया कठिण खडकांमध्ये ३० सें.मी. खोलीपर्यंत गुंतावा मधून करण्यात यावे. अशाप्रकारची पडद्वी ही सिमेंट बंधाराच्या भिंतीचा वरचा भाग (बार) पर्यंत घेण्यात यावी. सिमेंट

## Case Study: - Percolation Tank at Kalytan Village (Mengjai dara), Tal - Haveli, Dist – Pune

**Fig.1. Satellite image of Kalyan Dam**

Kalyan is located in the Sinhagad fort on the west side of Pune city. Kalyan village is at the foot of Sinhagad fort and is located in hilly and remote areas. As there is no large and medium scale project in this area, most villages in this area are deprived of irrigation facilities. In this area, even though it has received 93.12 inches of rain, the village experiences severe shortage of drinking water for 4 to 5 months after the rains. Drinking water suppliers have to be supplied. Apart from this, the cattle business here has been adversely affected due to lack of water. There is no irrigation system for the rabi season due to irrigation. Therefore, MLA Bhimarao Tapakir Sao, MLA of Haveli taluka & the group gram panchayat Kalyan informed the Executive Engineer, Small Irrigation Department, Z. P. Pune about the survey of the pond in this area, and informed the Executive Engineer, Small Irrigation Department, ZP, Pune and Budget is prepared by surveying the work.

The percolation tank of these above features was constructed in Kalyan village December 2015. The tanks outcomes for whole year are best but during summer season it is not able to fulfill the water requirement of villagers. Water shortage is one of the main problems faced by these people from village so our main objective of project is to retain the water percolation tank and also increase ground water level for wells which are present in village.

### Location of Site

The project is located in Kalyan, Tal Haveli and 20 km west of Shivapur village and 35 km from Pune city.

- Map No.47, F11 & 47 f 15
- Longitude- 73°40'15".
- Latitude- 18°21'5"

### Salient Features

Catchment area	1.050 sq.km (0.59 Km <sup>2</sup> )
Capacity	4.96 million cubic feet
Available yield	31.90 million cubic feet
Length of dam	88 m
Maximum height of dam	10.20 m
Lowest Nalla Bed (NBD)	928.55 m
F.S.L. RL (FTL)	936.75 m
H.F.L. RL (HFL)	937.75 m
T.B.L. RL	938.75 m
Irrigable area	31 hectares
Length of waste weir	20 m
Width of waste weir	120 m

Typical C/S of Percolation Tank

### Rainfall Data (2000-2019)

Total Annual Rainfall data is taken into account at Velhe observatory, located at 10 Km away from kalyan village. Catchment number (CAT) - 307, Latitude in degree (LA) N – 18, Longitude in degree (LO) – 73,

YEAR	ARF (mm)	NOB
2000	1330.0	366
2001	1931.0	364
2003	1420.0	365
2004	2054.4	366
2005	6320.6	365
2006	3997.0	365
2007	3263.0	364
2008	2409.0	366
2009	1405.0	365
2010	2043.0	365
2011	2695.1	365
2012	2070.4	366
2013	2069.6	365
2014	1812.4	365
2015	1662.6	365
2016	1832.2	366
2017	2587.0	174
2018	1674.8	365
2019	3970.3	164

**Rainfall data (years) = 2000-2019**

Average yearly rainfall in inch = 98

50% Dependable monsoon rainfall = 2449.86 mm

### Storage Calculations

Catchment Area – 0.59 Km<sup>2</sup>, Rainfall Station – Velhe, Average Mansoon Rainfall – 98 inch

Assuming Silt Rate – 6HM/100 SQ, KM /Year = 37.80 TCM.

Yield Calculations – 40.74 MCFT = 1153.96 TCM = 4, 07, 40,000 litres.

Discharge as per Inglis Formula – 29.40 m<sup>3</sup>/s.

### Flank Wall of Waste Weir

### DAM SURVEY

All India Shree Shivaji Memorial Society's College of Engineering, Pune conducted Dam Survey, in association with Civil Engineering Department, National Service Scheme & Unnat Bharat Abhiyan at Kalyan village, Tal. Haveli, Dist. Pune on Friday 15<sup>th</sup> Jan. 2021 under Presence of Sarpanch Shri. Rajesh Dimble, other former members of Gram panchayat, Medical Officers, Principal Dr. D. S. Bormane Sir, Dr. N. S. Shejwal- Program Officer NSS, Dr. P B Nangare, Prof. V S Chavhan & UBA Volunteers of AISSMS College of Engineering . The main purpose of dam survey was to solve the problems of villagers about consumption of rainwater. Principal Dr. D. S. Bormane, Dr. P. B. Nangare & Dr. N. S. Shejwal motivated to villagers to give contribution as per their strength.

We had visited Kalyan gaon, Pune on 21<sup>st</sup> Jan 2021. Topographical survey have been carried out as per the guidelines given by Dr. P. B. Nangare. We also have discussed how to increase catchment area by identifying the selection site criteria. Tentative depth of the dam had been analysed. Dr. P. B. Nangare has suggested idea of vertical cutoff and provision of HDPE

Sheet, the secondary dam on downstream site. Civil Engineering Faculty had taken efforts to solve seepage problems with optimum solution.

Conventional survey of the dam carried with the use of surveying instruments like total station, Auto level, ranging rod, reflecting mirror and levelling staff etc. Volunteers was been divided in to certain groups to carry out different stages of survey. First group was measuring the distance at interval of 10 m and correspondingly 5 m each to left and right side of 10 m distance marked. Second group of students was taking the levels with the help of Auto level. Reduced levels of all the points located on upstream side of dam is taken it and prepared contour map. Based on contour map find out reservoir capacity, yield of reservoir as per availability of rainfall data at nearby observatory located at Velhe.

Soil testing and waste weir level had been analyzed, considering the necessary points from the villagers like history of the dam, demand of water for drinking, washing purposes. NSS volunteers under the guidance of Dr. P. B. Nangare has now taken up survey and executed dam survey by focusing following points.

1. Topographical features
2. Site Selection Criteria and catchment area
3. Waste weir level checking, Soil Testing
4. Seepage Analysis
5. Suggestion about secondary dam at downstream site
6. Investigation on water retain
7. Villagers opinions and demands

Fig 2. Principal Dr. D S Bormane, Sarpanch Shri. Rajesh Dimble, Dr. P B Nangare, Students and Villagers

Fig. 3. Dam Survey and Investigation carried by team of AISSMS COE Pune

### Lidar Survey

It has been found that some corrections and error occurred in Contour Map and decided to carry out this work with Advance Instrument to rectify errors in conventional surveying. Further Survey is carried out by All India Shri Shivaji Memorial Society's College of Engineering, Pune-01, Unnat Bharat Abhiyan unit at Kalyan, Tal. Haveli, Dist. Pune on Monday 8<sup>th</sup> Feb. 2021 under presence of Sarpanch Shri. Rajesh Dimble, NSS programme Officer Dr. N. S. Shejwal, HOD of Civil Engineering Dr. U. R. Awari, Prof. P. R. Modak Sir, Prof. V.S, Chavhan. The main objective of survey is to solve the problems of villagers about consumption of rainwater.

Topographical survey have been carried out as per the guidelines given by consulting team of Trident Engineers, Shri. B.S. Holkar. We also have discussed how to increase catchment area by identifying the selection site criteria. Advance survey is carried with Trimble GPS R10, to collect more accurate data faster and easier – no matter what the job or the environment, with the Trimble® R10 GNSS System. Built with powerful technologies integrated into a sleek design, this system provides surveyors with a powerful way to increase data collection productivity in every job, every day. The Trimble R10 GNSS receiver LEDs enable you to monitor satellite tracking, radio reception, data logging status, Wi-Fi status, and power. Bluetooth wireless technology provides cable-free communications between the receiver and controller. With the help of this apparatus we are able to measure the height, length, width and depth of the dam basin accurately. The receiver that calculates all the data is fitted onto a specific bag, which the person surveying wears on his back and has to walk and cover the required area to be surveyed. While the second

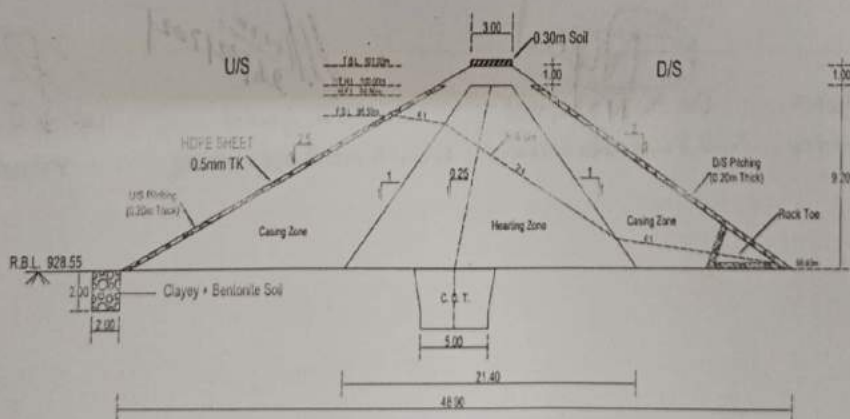

receiver is set at a stationary point which sends the information from the first receiver to the satellite for accurate readings.

Fig. 5. Survey Expert Mr. B.S. Holkar, Dr. U R Awari , Dr. N S Shejwal, Prof. V S Chavhan & Prof. P R Modak

### Provision as per Guidelines provided by Govt. of Maharashtra

AS per guidelines provided by Govt. of Maharashtra, in this dam suggested that vertical cutoff is provided on upstream side by excavating trenches of 2 m width and depth is 2 m or extended upto hard strata. Vertical cut off is filled by mixture of clayey soil and bentonite soil with provision of 500 micron (0.5 mm) HDPE sheet. HDPE Sheet is provided on upstream side of dam and then covered on top of dam and extended by 1m on its downstream side. At top of dam available soil is filled and compacted to 0.30 m depth. Upstream side of dam is suggested to filled and compacted with bentonite soil.

### Expected Storage calculations

- Measured Catchment area as per Lidar survey – 0.59 Km<sup>2</sup>
- Available water capacity as per present Scenario – 1,78,43,000 litres
- Expected availability of water after removal of silt load – 3, 45, 63,000 litres.
- Yield of water as per average yearly annual rainfall – 4, 07, 40,000 litres.
- Reservoir capacity of dam to hold water – 8, 43, 00000 litres.
- Demand of water as per present population – 9, 49, 00000 litres.

### Cost Analysis

Sr. No.	Description of items	Area/Volume	Unit	Rate	Amount (Rs.)
1	HDPE Sheet of 0.5 mm thick	1737.12	m <sup>2</sup>	140	2,43,196.80
2	Excavation	27705.48	m <sup>3</sup>	80	22,16438.00
3	Bentonite + clayey Soil	352	m <sup>3</sup>	lumsun	25000.00
<b>Total Cost</b>					<b>24,84,634.00</b>
